# Protective Floor Coatings

This hardwearing range of epoxy products feature top quality coating formulations which are ideal for keeping floor areas protected and looking good. They have been specifically designed with the durability characteristics required to cope with being driven, rolled and walked on day-in, day-out.

Versatility and practicality are also highlights. A range of non-slip additives can be used, including 'Rubberised' (creates an excellent bare feet friendly surface for applications such as boat decks or around swimming pools), 'Garnet' (provides added grip for slip hazard locations such as steps) and 'Crushed Marble' (provides an industrial grade, high grip finish). In addition, a wide palette of colours provides a perfect solution for marking out specific areas, such as walkways, hazardous areas and safety equipment points.

A range of line marking products are also available. Please contact your local PPG LIC representative for further information.

## SEF-381 Solventless Epoxy

This 100% volume solids product is solventless and odour free on application and provides strong chemical and solvent resistance, making it suitable for food processing areas. It features self levelling characteristics and dries to a tough, durable, ceramic tile-like finish.

## 370 Epotec

Provides outstanding adhesion to most surfaces, along with excellent flexibility and high resistance to most chemicals. Suitable for food and beverage plants. A non-skid medium can be utilized between coats.

## Amerlock 400

A high solids product that delivers excellent durability and strong chemical and solvent resistance. The ability to cure down to 5°C adds extra versatility and there is the option to use an accelerated hardener to suit application conditions. Also available in a non-skid version.

### PPG know-how and support

Nothing beats the ability to get expert assistance when you need it. The LIC Technical Support Team is just a phone call away and they will be happy to help you choose the correct products for your application and provide technical advice.

### Locally made for local conditions

All products are manufactured in Australia under strict quality control and have been specifically tuned to provide superior performance under Australian conditions.
